

Travis A Durrant

Full Stack Python Developer

TravisADurrant@gmail.com | 801-979-5080 | Draper, UT, 84020 | [Github](#) | [LinkedIn](#) | [Personal](#)

EDUCATION

DevMountain, Lehi, UT

Full Stack Web Development Program as a Python Specialist

Graduated September 2022

TECHNICAL SKILLS

UI Technology: Python, HTML5, CSS3, SASS, Bootstrap, jQuery, Ruby

Python Packages: NumPy, Pandas, Matplotlib, PyTorch, Pipenv, FastAPI, PyTest

GUI Technology: Tkinter

Libraries and Frameworks: Flask, Jinja2, AngularJS 1, x/2.0/4.0, Node.js, JavaScript

Web Services Technologies: XML, JSON, REST

Web Service Platforms: Shopify, WordPress, Postman

Databases: MySQL, MongoDB, Oracle, SQL Server, SQLAlchemy, PostgreSQL, SQLite

Version Control Tools: GIT, Github

Development Methodologies: Agile

Deployment Operating Systems: Amazon Web Services (AWS), Windows

Editors: text, notepad++, Atom, Visual Studio Code

PROFESSIONAL EXPERIENCE

Twisted Habits | Draper, UT

June 2018 - Current

Software Engineer / Product Specialist

Ruby | Rails | HTML5 | jQuery | JavaScript | CSS | Shopify | WordPress

- Built, enhanced, and maintained an eCommerce website (Shopify)
- Utilized collaboration software with team members – Google Docs, Sheets, Drive
- Installed and embedded several plugins to streamline and automate marketing campaigns (Google, Facebook, Pinterest, Instagram, Klaviyo)
- Optimized webpage for ease of use across mobile platforms
- Created a blog used from WordPress and attached it to the Shopify footer navigation

Devmountain | Lehi, UT

June 2022 - September 2022

Full Stack Python Developer (student)

Debt Dismantling - [GitHub Repo](#) | [Demo](#)

Python | Flask | Flask-SQLAlchemy | Flask-WTF | SQLite | Bootstrap | CSS | HTML5 | GitHub

- Developed an application for debt tracking and managing
- Implemented Flask to work with full CRUD capabilities and to display database information
- Created Flask user-based profiles and accounts to access and use SQLAlchemy user specific data
- Integrated logic to illustrate financial benefits of using either the "snowball" or "avalanche" debt payoff techniques
- Learned how to create and manage amortization tables for better understanding of debt dismantling plans

Perfect Temps - [GitHub Repo](#) | [Demo](#)

CSS | PostgreSQL | HTML5 | JavaScript | Java | Axios | GitHub

- Developed an online, user-facing tracking application for 3D printer temperature specifications and averages
- Utilized multiple coding languages to create and implement the full stack application
- Tutored classmates on concepts and core coding fundamentals, ensuring a positive environment (Discord, Zoom)
- Polished skills and gained additional knowledge and abilities with front-end, back-end, and server related developmental coding (PluralSight, Udemy, Devmountain)

Maurices | Sandy, UT

Oct 2022 – Feb 2024

First Assistant Manager

- Quickly moved up from a part time backroom stocker to the first assistant manager.
- Constant and vigilant review of processes and software for improvement. An improvement I headed is implementing a printed version of customer digital signatures on receipts to nullify the need for a digital and physical signature; halving the time needed per customer and saving massive amounts of time and money for our company.
- Daily adaptation to changes within the company and direction while training staff to be the best they can be.
- Managed inventory levels of supplies and marketing materials.
- Performed general maintenance throughout the facility and provided technical support for computer issues.
- Wrote, created, and maintained schedules for our staff.
- Spearheaded floor changes and ensured proper visual guidelines were followed.

Henry Schein One | American Fork, UT

November 2021 – May 2022

Technician III

CMD | HTML5 | CSS

- Provided exemplary customer service and technical support (Salesforce, Bomgar, Dentrux)
- Collaborated remotely with team to teach known solutions, troubleshoot, and provide feedback on new, unknown, and uncommon issues (Microsoft Teams)
- Provided code corrections and samples to Dev Team for company website and Salesforce application
- Utilized command prompt to troubleshoot, update, and fix underlying customer computer issues
- Guided several training sessions for new team members on software and troubleshooting procedures
